- 6 litre pure water capacity
- 9 litre recovered water capacity
- 230 volt, 1200W motor
- 26.8 metre range from power socket
- Easy to move trolley with large wheels
- Cable stowage

For spotless, streak free and squeaky clean interior glass, cladding and signage the new Glasshopper™ reaches from ground floor to over 22'. Lightweight telescopic sections make height adjustment a doddle and glass is left perfectly clean with minimal physical effort.

The Glasshopper™ sprays a fine jet of pure water, in front of a microfibre sleeve, which breaks through surface tension on glass or cladding and releases the dirty film, all in one pass. Then the operator simply flips the Glasshopper™ around and uses the powerful vacuum squeegee to leave the surface perfectly clean and dry with no water run off or drips.

Ideal for use in shopping centres, schools, colleges, leisure centres, hotels and hospitals. The Glasshopper™ is supplied as a complete stand alone kit and there is a choice of stainless steel, glass fibre or ultra lightweight carbon fibre pole sections.
